Subject: Y-12 bomb plant

Security by bombing is outdated technology. Please consider spending my tax dollars on Conflict Resolution and making friends. Help other nations by educating the masses. The technologies involving brain coherence at the Unified Field level should also be researched. Techniques of reducing stress at the individual level like TM meditation should also be investigated. The idea of a defensive system that is based on solving problems at their origin would be more effective and more economical. Large military complexes have failed the world community in the past and will fail us in the future. Please don't spend more money on outdated military systems. Reducing stress and making friends can be the only defense against terrorism and the only chance for World Peace.

1/16

Thanks for your time,
William G. Wakefield II
Monroe, Washington

Comment No. 1

Issue Code: 16

Comment noted. The Y-12 SWEIS assesses the potential environmental impacts associated with the continued operation of the Y-12 National Security Complex, and the proposed construction and operation of new facilities for the HEU Storage Mission and Special Materials Mission at Y-12. There is no proposal to expand capabilities or increase nuclear weapons production at Y-12.

DOE is responsible for meeting the current requirements set forth by the President and Congress in the Nuclear Weapons Stockpile Memorandum, which is updated annually. The need for nuclear weapons and whether DOE should produce nuclear weapons are beyond the scope of the Y-12 SWEIS.
